for a variety of industries

**MULTIPLE BENEFITS
WITH AN EASY SOLUTION!**

Dizanta enables you to make
considerable improvements in the
execution of your business processes.
This will result in major benefits!

Let Dizanta work for you

DO YOU WANT TO IMPROVE QUALITY MANAGEMENT AND THE LEVEL OF QUALITY YOU OFFER?

DO YOU WANT TO CREATE SAFER ENVIRONMENTS FOR YOUR OPERATORS?

DO YOU WANT TO REDUCE LABOUR COSTS, MATERIAL COSTS AND TURNAROUND TIMES?

DO YOU WANT TO MINIMISE INVESTMENTS AND REALISE FAST RETURNS?

IF SO, DIZANTA CAN OFFER THE ASSISTANCE YOU REQUIRE.

Dizanta is an intelligent operating tool that helps to manage diverse processes and production in various industries. It is more than an interface between your operator and your plant. Dizanta will help to perfectly execute your R&D or production process in accordance with your specific parameters.

Dizanta - human flexibility with the reliability and consistency of a machine.

Once you have installed Dizanta, it will immediately offer the following benefits:

Savings:

- reduction in labour costs
- lower scrapping costs
- shorter R&D or production processes

Quality:

- repeatable processes
- no human errors during execution
- process validation
- checks and reports for parameters

Safety:

- lower deployment of operators

Smart Design:

- user friendly
- flexible
- easy to operate

And above all, Dizanta only requires a small investment. Every Dizanta installation realises a return on investment within 6 months! It offers proven solutions for R&D and production processes.

Dizanta - another innovation by Pro Control.

Pro Control was founded in 1996 as a specialist in the field of control systems for R&D and production. In particular, our focus is the development and application of process control and data acquisition systems that help to improve processes. Since the company was founded over a decade ago, we have managed to establish an outstanding reputation among clients worldwide. Our professional objective is to use our expertise to serve and assist clients in accordance with their needs. Today, we do not only develop and deliver high quality products, but we also work with customers to realise long-term solutions for further improving R&D and production. Dizanta is a tool based on numerous solutions we developed for clients in recent years.

Dizanta - call or e-mail us for a more detailed introduction.

Naturally, having read about Dizanta, you will want to know how it applies to your sector or your specific process. Please contact us and we will be happy to explain in greater detail.

You can also contact us for testimonials.
